CUSTOM BOCA SPORT CHAIR

FEATURED ON A SPORTSMAN HERITAGE 261

ABOUT

TACO SEATING

Decades of experience with marine product design, engineering and manufacturing helped us to create and deliver TACO Seating – a full line of marine upholstery products. Our seating capabilities include an extensive range of hardware and upholstery packages – providing boat builders with a complete solution for upholstery needs.

BRINGING YOUR VISIONS TO LIFE

Our goal at TACO Seating is to partner with boat builders to create one-of-a-kind marine seating solutions. From helm chairs, pedestals and electric slides through complete custom upholstery that includes combing pads, cushions, hardware and more, we strive to bring your boat upholstery and hardware visions to life with an unmatched attention to detail.

A CUT ABOVE

At TACO Seating, we use only the highest-quality fabrics and components when crafting your luxury seating solutions. Our line of helm chairs and benches meet the highest standards in place by the ABYC. Before any Seating product leaves our doors, our team of Quality Technicians inspect everything to ensure our high standards of excellence and appearance are met.

“BOAT IN A BOX”

The boat in a box concept provides a complete solution for upholstery needs by delivering an entire boat worth of upholstery in a single box/pallet (bolsters, backs, bottoms, armrests, cabin parts, etc.). TACO can simply deliver a box of parts right to production to have all the needed upholstery and hardware in one place. This provides an easier method of ordering and receiving – reducing storage and handling.
