

ALUMINUM OVAL TUBE

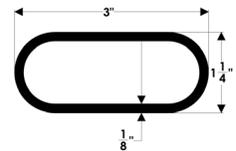

Achieve the ultimate in craftsmanship, artistry, bendability and strength with our aluminum tube - ideal for the construction of T-tops, tuna towers, leaning posts, poling platforms, bow rails, wake towers, arches and other marine metal structures. The unique properties of aluminum pipe allow fabricators to achieve desired bends and welding while maintaining stability and excellence.

FEATURES & BENEFITS

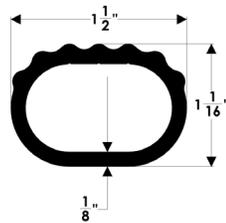

- Oval shape is ideal for step treads, grab rails, bow rails, canvas top and can be used on T-top for running wire chase
- Premium anodized aluminum
- 320 grit finish on flat surface only
 - A42-0195 only - Strep tread 0.47-inch height
